

EDUCATION

B.TECH(MECHANICAL ENGINEERING)

CGPA: 8.4

SRM UNIVERSITY

2018-2022

MBA(BUSINESS ANALYTICS)

CGPA: 8.65

SRM UNIVERSITY

2022-2024

SKILLS

- **Programming:** Core Java, SQL, JavaScript, TypeScript, JSP, HTML, CSS
- **Technologies:** Spring Boot, Angular, AEM
- **Database & tools:** SQL, IBM DB2, DBeaver, AQT
- **Tools:** Git, Git Bash, Postman, Toolkit UI, WinSCP, Rally, RAD, VS Code, IntelliJ

SOFT SKILLS

- Time Management
- Adaptability
- Proactive approach
- Decision-making
- Collaboration and Communication

RECOGNITION

- **Football district player**
- **Badminton**
- **Early Bird Winner** - Blue Bolt Hackathon, Cognizant- Appreciated for early participation and idea contribution.

PROFILE SUMMARY

Experienced and results-driven Software Engineer specializing in Java development, with 2+ years of experience in building scalable and efficient applications. Skilled in problem-solving, writing clean and maintainable code, and enhancing software performance. Adept at working in agile methodologies, ensuring seamless collaboration and responsiveness to evolving project requirements. Proven track record in mentoring and training team members, facilitating effective knowledge transfer, and fostering both personal and organizational growth.

PROFESSIONAL EXPERIENCE

Software Engineer

Cognizant Technology Solutions | 2022- Present

- Initially worked on J2EE applications, developing features using Java and JSP, including functionalities like Export to Excel for generating structured reports.
- Developed and maintained backend services using Spring Boot, improving performance and scalability.
- Built and integrated RESTful APIs, ensuring seamless communication between system components.
- Worked on frontend development using Angular, enhancing user experience and responsiveness.
- Implemented Forward Mapping and Reverse Mapping in database entries to maintain data integrity.
- Managed UI content in AEM, ensuring efficient content delivery and customization.
- Optimized database queries and performance, improving data retrieval efficiency.
- Conducted API testing and debugging, ensuring smooth integration and functionality.
- Collaborated with cross-functional teams, including designers, testers to deliver high-quality software solutions.

ROLES & RESPONSIBILITIES

- Design, develop, and enhance Java applications, ensuring code quality and efficiency.
- Participate in discussions with Product Owners (PO), Business Analysts (BA), and Scrum Masters to understand requirements and provide technical insights.
- Fix defects and production issues, ensuring quick turnaround and minimal downtime.
- Provide immediate responses to critical issues and blockers.
- Attend daily stand-ups, sprint planning, and retrospectives, actively contributing to team discussions.
